Objective(s) for the Committee Call

- Recommendation 136, Engineering Evaluation/Cost Analysis (EE/CA) for Decommissioning of CPP-601/640 Fuel Reprocessing Facilities

The CAB discussed the comments to the recommendation and agreed to all of them. The decision was made to strike the last two sentences of the second paragraph (the discussion about curies), because they felt they were telling DOE something they already knew.

An additional comment was added about including a clay liner within the cap.

The final recommendation will be distributed by email for final approval from the CAB so that it can be transmitted to DOE no later than Friday, February 15, 2008.
