

Citizens Advisory Board Committee Minutes

Committee: Strategic Issues

Date: June 7, 2007 – 9:30 a.m. (MT)

Participants

Board Members: John Bolliger, Committee Chair
Dick Buxton
Willie Preacher
Bruce Wendle

DOE-ID: Jim Cooper
Bill Leake
Bill Harker
Mark Shaw

Support Staff: Lisa Aldrich

Objective(s) for the Committee Call

- Review draft-final tour for July
- Materials Test Reactor (MTR) engineering evaluation/cost analysis (EE/CA)
- Presentation on Test Range Environmental Assessment (EA)/Finding of No Significant Impact (FONSI).

July Tour

Draft-final tour plans are as follows:

7:30	Leave Idaho Falls
8:30	Arrive Radioactive Waste Management Complex (RWMC)
8:30 - 9:30	Discuss RWMC groundwater sites
9:30	Leave RWMC, drive by Pit 9 decontamination and decommissioning (D&D) on way out (should be almost done by July)
10:00	Arrive Reactor Technology Complex (RTC)
10:00 - 11:00	Tour RTC D&D sites
11:00 - 12:00	Discuss RTC groundwater sites
12:00 - 1:00	Lunch
1:00	Leave RTC
1:30	Arrive Idaho Nuclear Technology and Engineering Center (INTEC)
1:30 - 2:30	Discuss INTEC groundwater sites
2:30 - 3:30	Tour INTEC D&D Sites
3:30	Back to Idaho Falls

The committee felt like the tour agenda met the information needs of the CAB; however, Dick Buxton wanted to ensure that the Idaho CERCLA Disposal Facility (ICDF) would be included. Jim Cooper suggested that the MTR and Power Burst Facility (PBF) might be at a good point to view progress of the D&D. DOE agreed to adjust the tour plans to include these areas of interest.

MTR EE/CA

The document for the MTR EE/CA is planned for release in early July. DOE will provide a presentation at the July meeting.
